NOTES

The figures in this manual are purely guideline and the images may contain differences with respect to the actual equipment to which they refer.

1.1 INTRODUCTION

PIONEER 403-503MSR is a power source for welding.
When combined with a wire feeder it can be used for MIG/MAG welding.

Fan. The fan is turned on only during welding, at the end of the welding process it remains on for a fixed period of time according to welding conditions.
The fan is nonetheless controlled by specific thermal sensors that guarantee a correct cooling of the machine.

Accessories/ancillary devices that can be connected to the unit:

- Power source trolley for multi-function configuration (MIG/MAG).
- Liquid cooler for MIG/MAG torches.
- Wire feeder.

Consult your dealer for an updated list of accessories and the latest new products available.

2 INSTALLATION

DANGER! *Lifting and positioning*

Read the warnings highlighted by the following symbols in the “General prescriptions for use”.

2.1 CONNECTIONS TO THE ELECTRICAL MAINS NETWORK

The mains power supply features to which the equipment should be connected are given in chapter “TECHNICAL DATA”.

The machine can be connected to motorgenerators provided their voltage is stabilised.
Connect/disconnect the various devices with the machine switched off.

2.2 FRONT PANEL

- Welding power source ON/OFF switch. [Item 1].
- Mains protection ON LED [Item 2].
- Earth welding socket [Item 3].

2.3 REAR PANEL

- Connector for connection to the programmer [Item 1]. Programming connector for the “pulsed” circuit board. You can update the software of the equipment using the programming kit.
- Cooler group power feeding connector [Item 2].
 - Voltage: 400 V a.c.
 - Current output: 1.0 A
 - IP protection rating: IP20 (cap open) / IP66 (cap closed)

DANGER!
High voltage!

If the socket is not connected to any devices always close cap

- Power cable [Item 3].
 - Total length (external part): 4,3 m
 - Number and cross section of wires: 4 x 6 mm²
 - Power plug type: not supplied
- Connector of the bundle of cables for connecting the power source to the remote control device [Item 4].
- Socket for connecting the power cable between the power source and the remote control device [Item 5].
